

Price and Occupancy Rate Optimization

Analytics Department

Po Wen Hsu, Jingshu Zhang, Kuan-Chung Chen, Safira Raharjo, Yijing Sun, Cong Liu

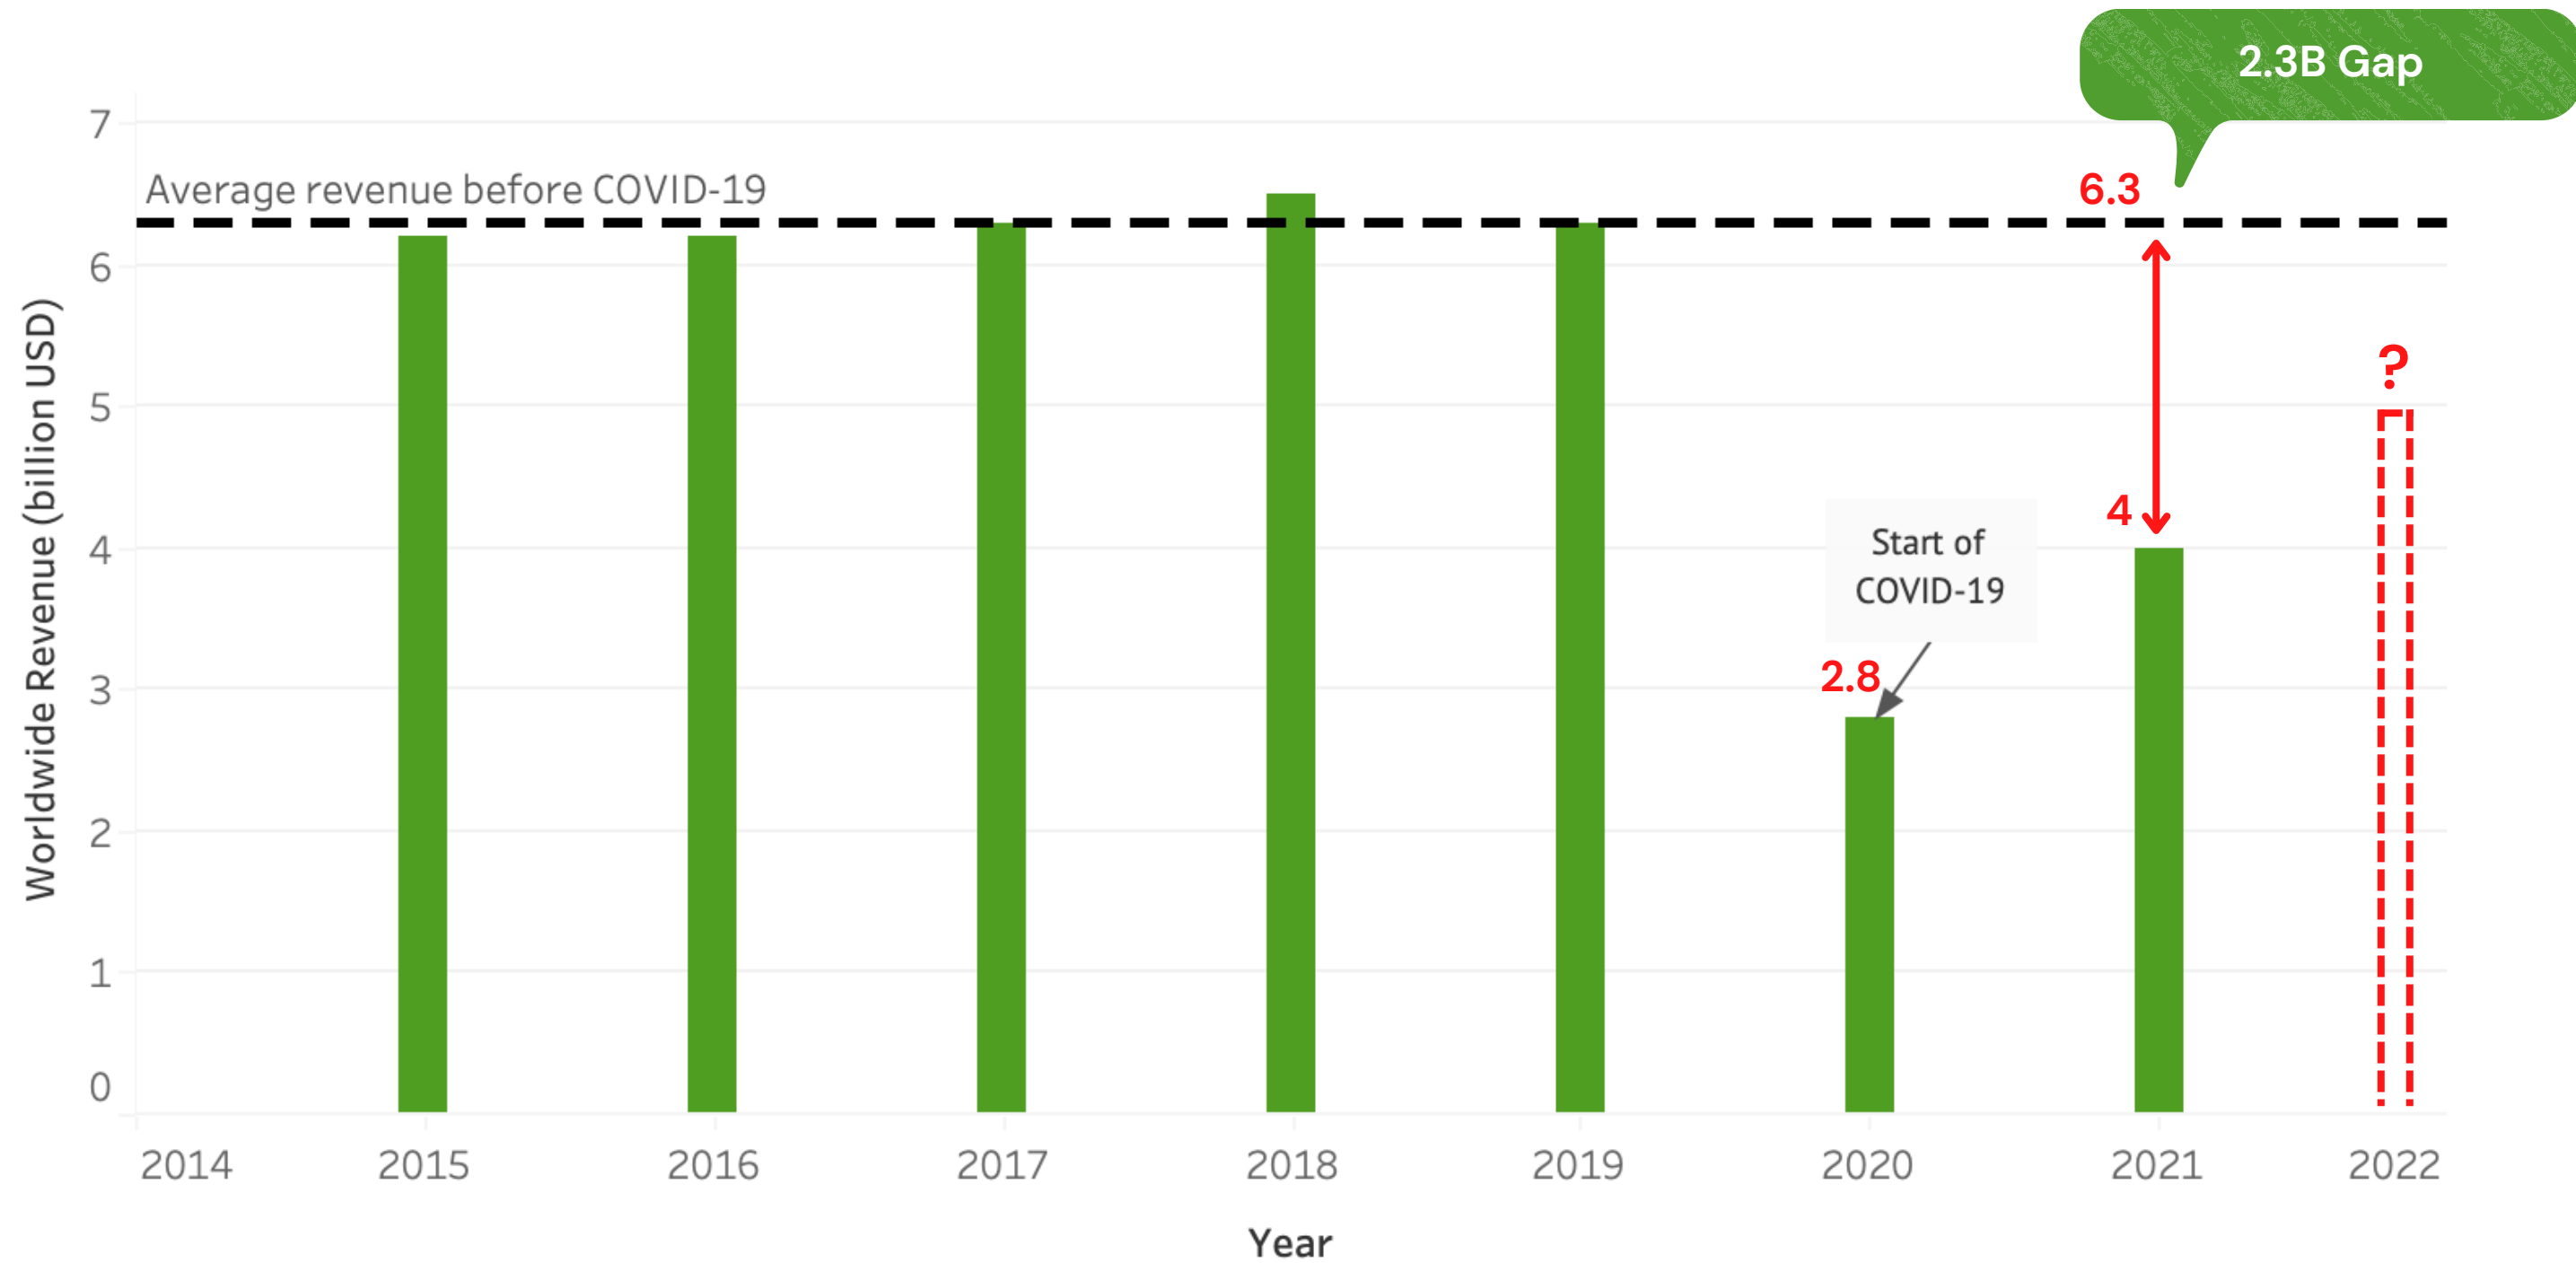

Potential Post-Pandemic Opportunities

The number of tourists in NYC is bouncing back

Holiday Inn Worldwide Revenue Over Time

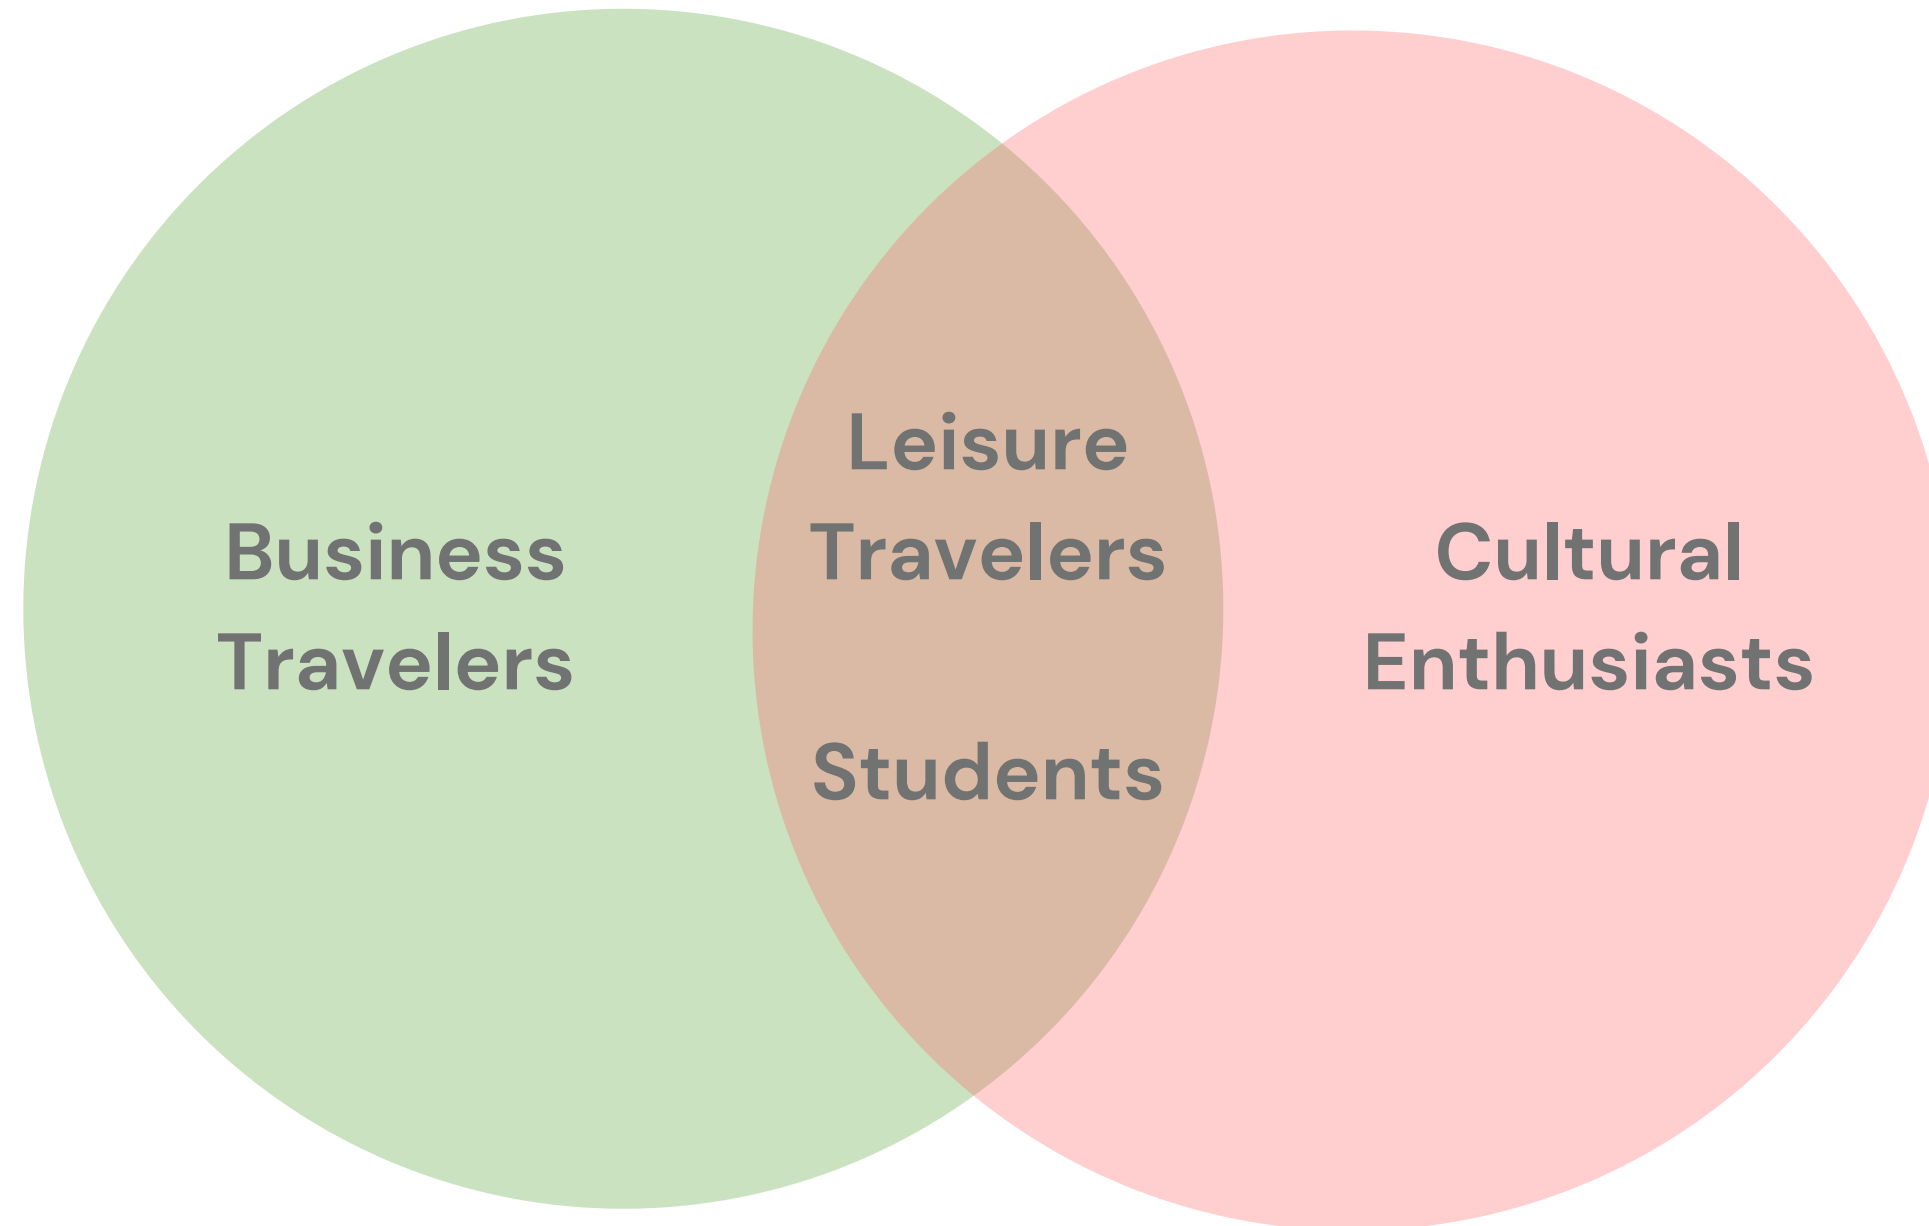

There is still a gap between current revenue and average revenue before COVID-19

Market Similarities of Holiday Inn & Airbnb

We both target a lot of the same markets in the middle-income group

Inside Airbnb Adding data to the debate

Inside Airbnb hosts free data scraped from Airbnb spanning many years and cities

Data Points

- Nightly prices
- Location and neighborhood
- Amenities
- Ratings
- Occupancy rate
- Room type

Occupancy Rates of Holiday Inn & Airbnb

Holiday Inn's occupancy rate is actually higher than Airbnb

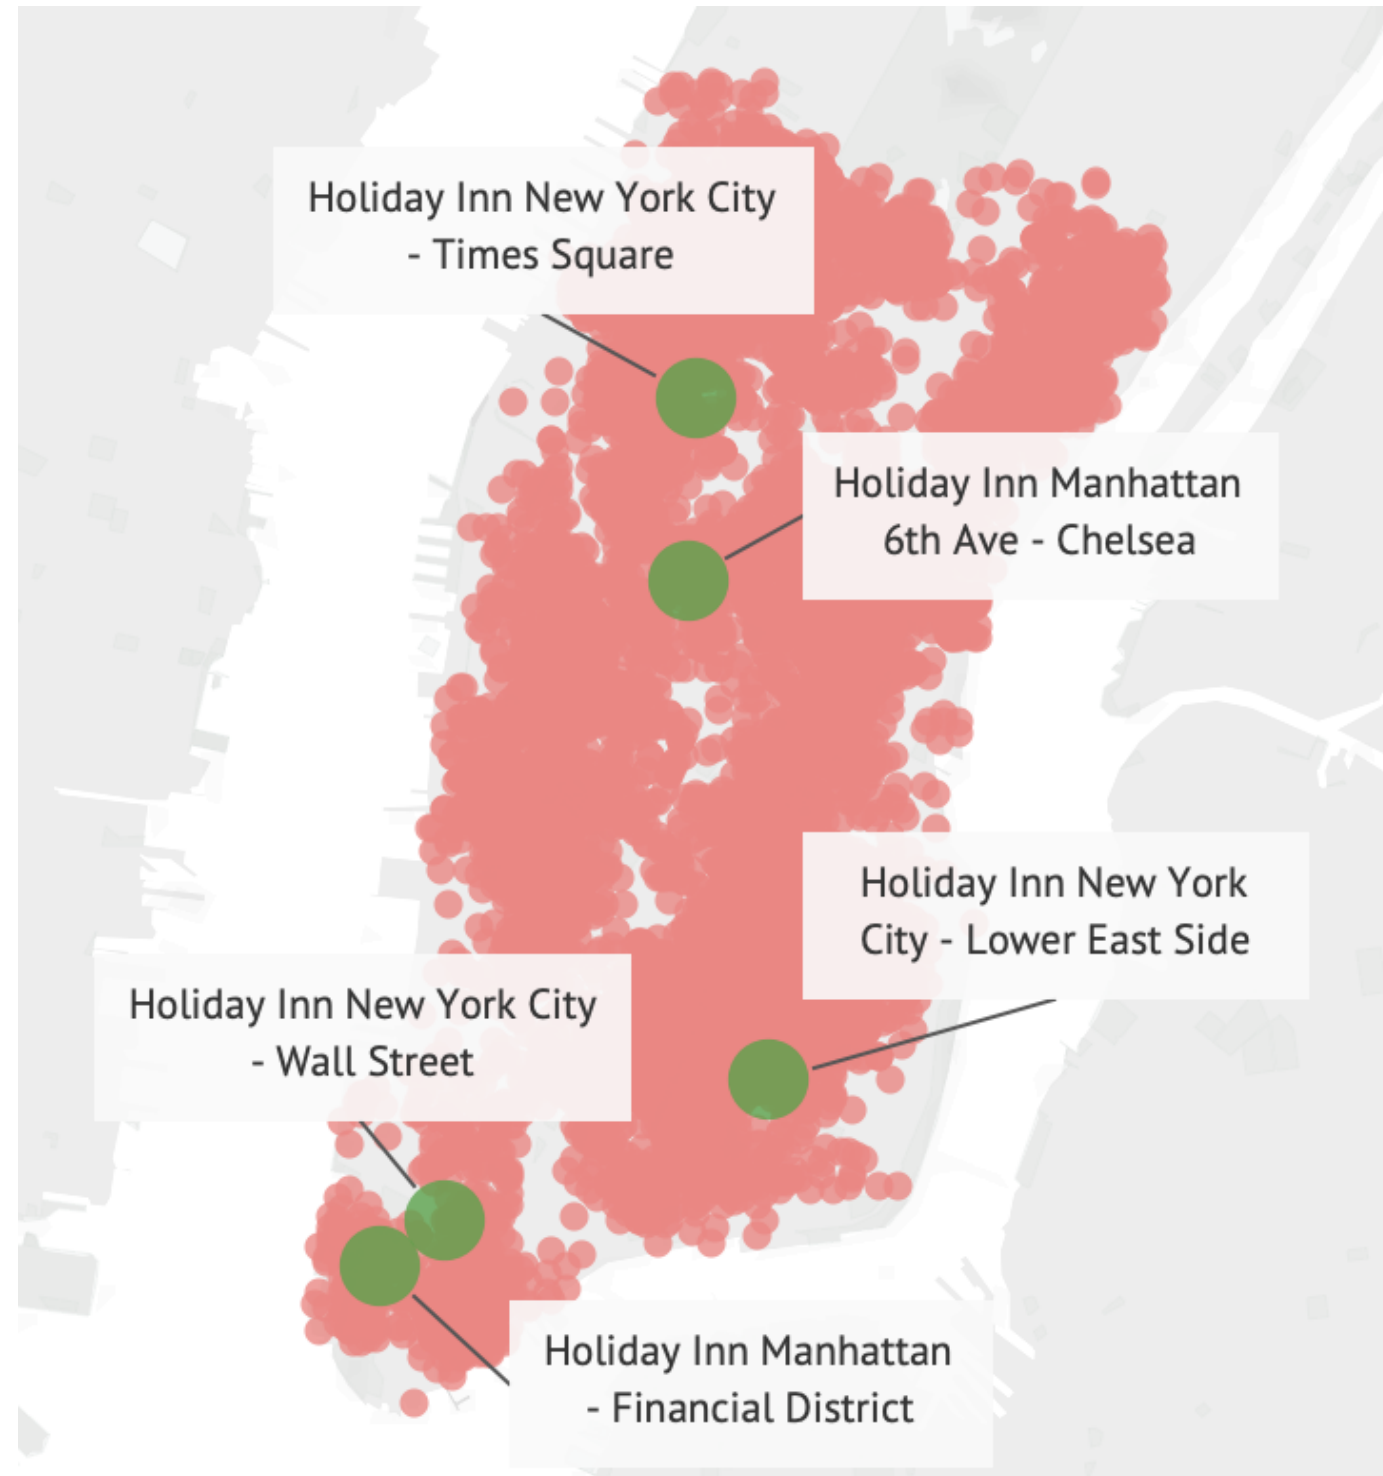

Occupancy rates at Holiday Inn and Airbnb follow the same pattern in NYC

$$\text{Occupancy Rate} = \frac{\text{Number of Occupied Rooms}}{\text{Number of Available Rooms}}$$

Distribution of Holiday Inn & Airbnb

in Lower Manhattan

Number of Rooms

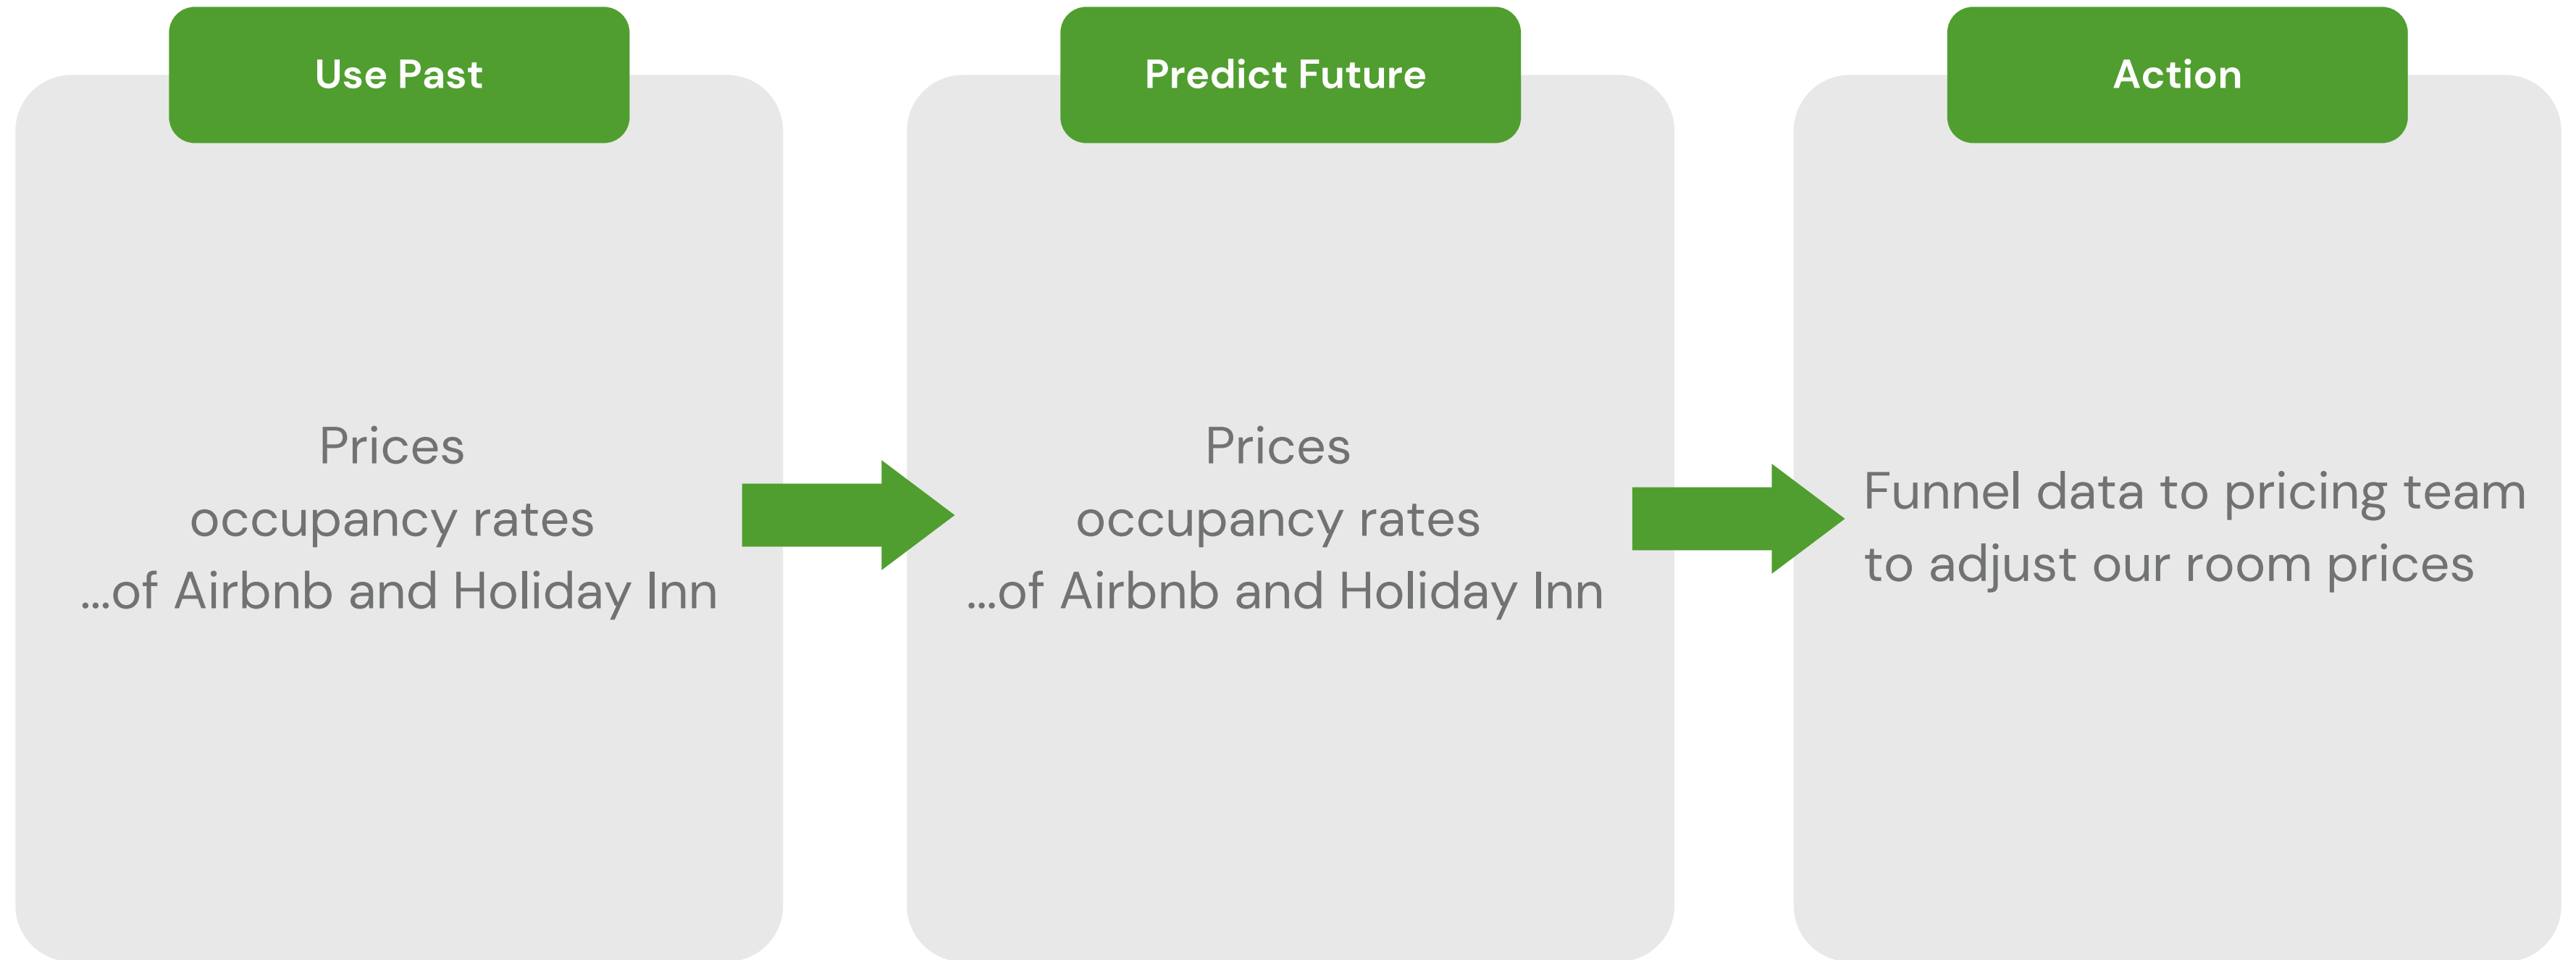

Nightly Prices of Holiday Inn & Airbnb

Airbnb's lower price likely contributes to lots of rooms being occupied despite the high number of rooms

Build a Predictive Model

Costs

1 2 full-time data scientists \$200,000

2 Training of pricing teams \$100,000

3 Upkeep and infrastructure \$600,000

\$900,000

Returns

- **\$6.5 million** (7% increase over projected revenue) over 2 years
- 622% ROI

To sum up...

- We need to take advantage of the tourism bounce-back
- We can do that by taking back some of Airbnb's market share
- Gaining insight from Airbnb can give us a competitive advantage

Any questions?

We need your help
to make this
happen!
